Analytical Thinking Skills

PROFILE

Self-driven and highly passionate about building products.
Results-driven Software Engineer with an overall 6+ years of experience
in full stack development.

I'm seeking to join a fast-paced startup environment that offers
opportunities to learn and work with highly driven individuals. I thrive
in settings where innovation is encouraged, and I can contribute to
impactful projects while continuously expanding my skill set.

TECH. STACK

Languages

Javascript, Typescript, Python — learning Elixir and Rust

Full stack Libraries and Frameworks

React, Nextjs, Tailwindcss, Styled Components, Shadcn, Redux,
Zustand, Jotai, Nextjs, Nodejs, Express, GraphQL, Apollo, gRPC,
Prosemirror, Tiptap, MongoDB, SQL, AWS, GCP, IBM, AWS CDK, Flutter,
NestJS, Postgres, Auth.js

LLMs and Agentic Application Frameworks

Langchain, Langgraph, Autogen, Atomic Agents

EMPLOYMENT HISTORY

Sr Full Stack Developer, Radise India

Hyderabad

Mar 2025 — Present

- Led the platform team since joining.
- Built the AI agent harness powering Sia, an AI assistant at Radise.
- Owned Project Vault, and Products, Projects and Licensing.
- Migrated the backend server from Express to NestJS.
- Implemented authentication with Auth.js on SmartInfra Hub.
- Built External Systems Integration and System accounts.
- Built Notifications and Notifications Management.
- Optimised the Nextjs application for performance.

Tech stack I'm working with at Radise India:

Nextjs, NestJS, Express, Postgres, Auth.js, Typescript, Javascript

LANGUAGES

English

French

Hindi

Telugu

HOBBIES

Sketching, UI/UX with Figma,
Video Editing with Davinci
Resolve and playing Ukelele.

SDE, Dataflix

Hyderabad

Oct 2023 — Feb 2025

- Designing and developing full stack RAG applications (GenIQ).
- Built alternative to chatGPT using Nextjs, tailwindcss, shadcn, supabase, Clerk, supabase, Auth0 for internal use at Dataflix.
- Worked with Langchain, Langgraph, Atomic agents and Autogen to build agentic applications.
- Worked on 3 major cloud platforms - GCP, IBM and AWS

Tech stack I'm working with at Dataflix:

Langchain, Langgraph, Atomic agents, Autogen, Ollama, AWS, AWS CDK, GCP, IBM, React, Typescript, Javascript, Python, Nodejs.

SDE, Hashnode

Sep 2022 — Sep 2023

Neptune Editor:

Neptune is the WYSIWYG editor at Hashnode. Integrated multiple blocks and Open AI integration into the editor to enhance user experience in writing content.

Design System: core team member on the Hashnode design system.

Tech stack I worked with at Hashnode:

Nextjs, Typescript, Javascript, Express, GraphQL, Zustand, AWS serverless, MongoDB, Prosemirror, Tiptap, OpenAI.

SDE, Terribly Tiny Tales

Sep 2020 — Sep 2022

Fambase:

Architected and built the front end of Fambase from scratch as an intern, then led front-end development and contributed to system design and backend.

Paytm mini-app:

A TTT app where writers share short stories under 120 words.

Built audio player module for users to listen to these stories.

Tech stack at TTT: Nextjs, Express, MySQL, Javascript

SIDE PROJECTS

Agents Society

A cloud-based, self-governed and self-improving agent harness.

EDUCATION

B.Tech CSE(Hons.), Lovely Professional
University

Jalandhar, Punjab

Jun 2017 — Jun 2021
